

acadience™

acadiencelearning.org

acadience™ reading is the new name of the DIBELS Next® assessment.

The same assessment you know and trust from the authors of DIBELS® 6th edition and DIBELS Next is coming together with our entire family of assessments and educational tools under a new name: Acadience.

For more than 25 years, the original authors of DIBELS have researched and developed assessments that help educators improve outcomes for students and schools. Now our pre-k to high school screening, diagnostic, and progress monitoring assessments for reading, and our K-6 screening and progress monitoring assessments for math are all together under one name: Acadience.

**Acadience Reading is the new name of the DIBELS Next assessment.
Acadience Math is the new name of the DIBELS Math assessment.
Acadience Data Management is the new name of the DIBELSnet® service.**

**The assessments remain the same. Benchmark goals stay the same.
Scores will be interpreted in the same way.**

acadience™ reading

Acadience Reading is designed to identify children experiencing difficulty in the acquisition of basic early literacy skills, in order to provide support early and prevent the occurrence of later reading difficulties.

acadience™ math

Acadience Math measures early numeracy, computation, and problem solving that function as indicators of the essential skills that every child must master in order to become proficient in mathematics.

Acadience Data Management provides schools with automated reports designed to help teachers and administrators make instructional decisions based on their students' performance.

Frequently Asked Questions

Q: Why are we changing our name?

As the original authors of the DIBELS assessments, we have been at the forefront of research and development of assessments that help educators to improve outcomes for students and schools for over 25 years. Through our continued research and development at Dynamic Measurement Group (DMG) over the past decade and a half, we have expanded far beyond the early literacy assessment for kindergarten and first grade we first offered. Our current family of assessments includes our screening and diagnostic reading assessments for grades K – 6 (DIBELS Next, DIBELS Survey, DIBELS Deep), early literacy assessment for preschool (PELI®), content area reading for grades 7-9 (CARI™), and math assessment for grades K-6 (DIBELS Math). Our new name, Acadience, brings all of our assessments into one comprehensive suite of educational tools.

Q: Have the assessments changed?

No, the assessments you know and are currently using will remain the same. The benchmark goals will stay the same and the scores will be interpreted in the same way. At this time, only the name is changing. If you have already downloaded materials as DIBELS Next, you may use them as they are the same as Acadience Reading.

Q: What if we use mCLASS DIBELS Next from Amplify or have already purchased DIBELS Next materials from Voyager Sopris Learning?

You may continue to use your DIBELS Next materials from Amplify and/or Voyager Sopris Learning. The mCLASS and Voyager Sopris DIBELS Next materials are the same as Acadience Reading. Amplify and Voyager Sopris Learning will continue to publish the Acadience Reading materials under the DIBELS Next name for a transition period.

Q: What about data management?

Our data reporting service, Acadience Data Management (previously known as DIBELSnet®), will continue to offer data management and reporting capabilities for the Acadience assessments. If you have been using our DIBELSnet service, you do not need to do anything. Everything will continue to work as it has in the past. If you were not already using DIBELSnet, we invite you to transition to Acadience Data Management (acadiencelearning.net).

Q: Is additional training required?

No. The Acadience Reading assessments are the same as the DIBELS Next assessments, and if you have already been trained, you will not need additional training. DMG will continue to provide training and professional development for the full suite of Acadience assessments through our ongoing onsite and online workshops as well as regional and national training institutes.

Q: How does Acadience Reading differ from DIBELS 8th Edition?

Acadience Reading is the new name for the DIBELS Next assessments by the original authors of DIBELS. We have sold the old "DIBELS" name to another agency, and we are not affiliated with 8th Edition, which is not a new version of DIBELS Next, and is not from the original authors. DIBELS 8th Edition has not been researched, validated or endorsed by us.

Q: What does all of this mean for you?

You can continue to use the same assessment tools you know. You will continue to have access to the authors along with the customer support from DMG that you have come to know and trust. While we have a new name, our goal remains the same: to help you improve academic success for your students and schools.
