Acadience Oral Reading Fluency Directions

Make sure you have reviewed the directions in the *Acadience Reading K–6 Assessment Manual* and have them available. Say these specific directions to the student:

- I would like you to read a story to me. Please do your best reading. If you do not know a word, I will read the word for you. Keep reading until I say "stop." Be ready to tell me all about the story when you finish. (Place the passage in front of the student.)
- Begin testing. Put your finger under the first word (point to the first word of the passage). Ready, begin.

Timing	1 minute. Start your stopwatch after the student says the first word of the passage. Place a bracket (]) and say Stop after 1 minute.
Wait	If no response in 3 seconds, say the word and mark it as incorrect.
Discontinue	If no words are read correctly in the first line, say Stop , record a score of 0, and do not administer Retell. If fewer than 40 words are read correctly on any passage, use professional judgment whether to administer Retell for that passage.
Reminders	If the student stops (not a hesitation on a specific item), say Keep going . (Repeat as often as needed.)
	If the student loses his/her place, point. (Repeat as often as needed.)

Notes:

Retell: A Chess Tournament

Now tell me as much as you can about the story you just read. Ready, begin.

Timing	1-minute maximum. Start your stopwatch after telling the student to begin. Say Stop after 1 minute.						
	If the student stops or hesitates for 3 seconds, select <i>one</i> of the following (allowed one time):						
Wait/ Reminder	—If the student has not said anything at all, provides a very limited response, or provides an off-track response, say <i>Tell me as much as you can about the st</i>						
	-Otherwise, ask Can you tell me anything more about the story?						
Discontinue	After the first reminder, if the student does not say anything or gets off track for 5 seconds, say Thank you and discontinue the task.

A Ne	ew Ball Game		
0	On the first day of school, F	Roy's teacher asked him to write a letter	14
14	about himself. Roy was glad to	have the chance to talk about his life in	29
29	Africa. Roy had been born in th	e United States, but his family had lived	43
43	in a small town in Africa for thr	ree years. Now his family had moved	57
57	back to the United States.		62
62	Roy's stepmom was a docto	or. She worked in a clinic, where she	74
74	treated sick people and gave im	munizations. His dad taught music at the	86
86	school Roy and his brother atter	nded. Roy and his friends played sports	98
98	together and practiced playing t	he instruments his dad taught them.	108
108	Football was his favorite sport a	and there always seemed to be a game	121
121	going after school.		124
124	In his letter, Roy wrote abo	ut his life and that he missed playing	137
137	football the most. He had seen A	American football and it was a very	150
150	different game. It was hard to fi	gure out why they were chasing each	163
163	other and when to cheer.		168
168	He handed the letter to his t	eacher the next morning. That afternoon	180
180	as he was leaving, his teacher ca	alled him over. Another boy was standing	193
193	next to her. "Roy, this is Spence	er," his teacher said. "He's going to	206
206	introduce you to the soccer team	n. I think you'll enjoy it."	217
217	Spencer smiled at Roy and	led him outside to the field, where a	230
230	group of kids were playing. "Th	ne teacher said you call this football in	243
	A frice but have it's called so as	" and Smannan Day lastrad anound	054

A Chess Tournament

0	The principal walked into the school library. She had just received a	12
12	letter inviting several members of the school's chess team to play in the	25
25	state championship. Rachel could hardly believe her ears when she heard	36
36	her name read as one of the people who had been chosen.	48
48	The chess club met twice a week after school in the library. Rachel's	61
61	teacher had suggested that she try it last year, because she knew that	74
74	Rachel loved problem solving. What started out as just an interesting	85
85	school activity was now something that she loved doing. Rachel had	96
96	become one of the club's best players. Still, she wondered if she was	109
109	good enough for this tournament.	114
114	Rachel talked it over with her parents and her teacher. They all	126
126	told her that she was chosen because she was a very good player. They	140
140	reminded her that no matter what the outcome was, she would enjoy	152
152	the challenge of each match and would learn from every game she	164
164	played. When Rachel thought about it, she realized they were right. The	176
176	tournament games would just be new puzzles to solve. Rachel felt more	188
188	confident.	189
189	When the tournament day arrived, Rachel was ready. After a good	200
200	night's rest and a healthy breakfast, she arrived early to check in. Then,	213
213	she played some practice games with her friends. Soon, it was time for	226
226	her first match to begin. Over the next two days, she played six games.	240
240	She won four, lost one, and had one tie. When the final points were	254

2 Acadience Oral Reading Fluency Level 3/Progress Monitoring 2 Total words: Errors (include skipped words): -Words correct: = Swimming the Channel In the sport of swimming, people have set many types of records. 0 12 Some records are for speed or distance. Other records are for swimming 12 24 across difficult waters. The English Channel swim is one of these. Many 24 36 people have dreamed about swimming across this stretch of water, but 36 47 very few have done it. Lynne Cox is one of the few. 47 59 The English Channel is between the French and English coasts. At its 71 59 shortest point, the distance across it is twenty-two miles, but the water is 71 85 so cold and the currents so strong that only ten percent of those who have 100 85 tried the swim have made it across. The first swimmer to do so was a 100 115 man named Matthew Webb. He made the swim in 1875, and it took him 129 115 more than twenty hours. 133 129 Lynne Cox first swam across the Channel in 1972. She had started 133 145 swimming at the age of three in Maine, but it wasn't until her family 159 145 moved to California that Lynne discovered her love of swimming in open 171 159 water. It was then that Lynne knew she wanted to swim the Channel. At 171 185 age fifteen, Lynne was the youngest person ever to attempt the swim. 197 185 She made it across in less than ten hours, which at that time was faster 212 197 than any other man or woman had ever done it. This first swim covered 212 226 a stretch of twenty-seven miles. The next year, Lynne returned and broke 239 226 her own record. She swam a thirty-three mile stretch of the Channel in 253 239 nine hours and thirty-six minutes. 253 259

		Words correct: =	
How	Worms Help Gardens		
0	If you want to have a beaut	iful garden, you should start with good	13
13	dirt. Garden soil needs to be can	ed for just like your plants do. Worms	27
27	can help you do this! Worms ha	ve been tending the soil since before the	41
41	last Ice Age and can live in mos	t places that are not too hot or cold. Most	58
58	worms are only several inches l	ong, but there are some types that can	71
71	grow to be longer than a car.		78
78	There are many different we	orms that can help your garden. The most	90
90	common is the earthworm. Eart	hworms eat their way through the soil,	101
101	making meals out of decaying p	lant matter and bacteria. Their waste,	112
112	called castings, helps enrich the	soil. As they move through the ground,	124
124	they create burrows or tunnels.	This helps get more air and water into the	138
138	dirt and keeps it from compacting	ng. Plant roots can grow more easily, and	151
151	water is able to stay in the soil f	for longer periods of time.	164
164	Another worm that can help	your garden is the red wiggler. These	176
176	worms don't burrow into the so	il. They feed on the surface, which makes	189
189	them perfect for composting. Co	ompost is a mixture of decaying organic	200
200	matter that is used to fertilize the	e land. It is made up of things like leaves	216
216	or grass clippings. It can also in	clude things like carrot peels and other	229
229	kitchen scraps. The wigglers are	e added to the mix, and they eat and	242
242	digest the food, leaving behind	their castings. Castings are then mixed	253
253	into soil before it is used for pla	nting. These worms can devour a lot of	268
268	waste. One pound of wigglers c	an eat eight ounces of food in a day!	282

3 Acadience Oral Reading Fluency Level 3/Progress Monitoring 3

	Words correct: =	
Roo	ftop Gardens	
0	What do you think of when you hear the word "garden"? Maybe	12
12	you have planted a garden at home. Many schools also have gardens that	25
25	students can work in. Most people think about gardens being planted in	37
37	the ground, but there are many other places to plant gardens. One good	50
50	place for a garden is on the roof!	58
58	A rooftop garden, or a "green roof," can be planted on top of a small	73
73	house or on a giant skyscraper. Almost any type of roof can have some	87
87	type of garden or green space. Even steep roofs can have a patch of grass	102
102	for wild flowers.	105
105	You might ask, "Why put a garden on the roof?" Roof gardens do	118
118	more than add spots of beauty to our rooftops. They are a good way to	133
133	help the environment in areas that are covered with concrete sidewalks	144
144	and paved streets.	147
147	Green roofs also provide insulation. They keep buildings cooler in	157
157	the summer and warmer in the winter. This saves energy and reduces the	170
170	amount of fuel we use. Rooftop gardens also help stop pollution. The	182
182	gardens soak up rainwater that would otherwise run off onto dirty streets	194
194	and roads. Less dirty water is able to pollute our rivers and streams.	207
207	Another great thing about rooftop gardens is that they offer a natural	219
219	place for birds to nest and live. Birds that normally would not be able	233
233	to find food or a safe place to nest in cities can live happily in rooftop	249
249	gardens.	250

Keeping the Planet Clean

0	No matter where you are in the world, you can always do your best	14
14	to keep the planet clean. Throwing away trash properly is one way to do	28
28	this. Recycling is another way.	33
33	People can litter without even knowing they are doing it. Sometimes,	44
44	drivers put trash in roadside bins that are overly full. Before the bin gets	58
58	emptied, the trash can spill out. It is then carried all over by the wind to	74
74	another place. Who knows where it might end up? Almost twenty percent	86
86	of our litter ends up in rivers and oceans. This affects our drinking water	100
100	as well as fish and other wildlife. If you are someplace and you are not	115
115	sure that the trash will be picked up, wait to throw it away in a place	131
131	where you know it will not become litter.	139
139	Even when it is thrown away properly, trash is bad for the Earth.	152
152	Another way to deal with trash is to make less of it. This is where	167
167	recycling can help. You can ask family and friends to buy things with	180
180	packaging that can be recycled or reused. You can also try to avoid paper	194
194	plates and cups and instead use washable dishes that you can use again.	207
207	Using reusable grocery sacks cuts down on the number of plastic bags	219
219	we use and throw away.	224
224	Sometimes you will need to use things you can't recycle or reuse.	236
236	The most important thing is to try to use less of this type of item. Doing	252
252	your part to help keep our planet clean helps us all.	263

Learning to Skateboard

0	The last box was finally unpacked at the new house. Zach had been	13
13	excited about moving to the city and about making new friends. He knew	26
26	he had several weeks to explore the neighborhood before school started,	37
37	and he realized that was plenty of time to learn his way around. He asked	52
52	his mom if he could walk to the nearby park.	62
62	From the road, the park looked like a giant green expanse. Now, he	75
75	saw that it was divided into different sections. The first thing that caught	88
88	his eye was the skate park. He sprinted to the gate and stood looking in at	104
104	the ramps and rails. He had a skateboard but had never learned to ride it.	119
119	The roads near his old house had been too rocky.	129
129	Just then, two boys zoomed up on skateboards and said hello. They	141
141	asked him if he skateboarded. He told them that he had a board but	155
155	had never had a place to learn. "Well, now you do," they said, and they	170
170	offered to teach him. Their names were Matt and Pablo, and they went	183
183	to the same school he was going to attend. Zach happily agreed to meet	197
197	them for a lesson.	201
201	The following afternoon, Zach went to find the boys. After putting	212
212	on helmets and pads, Matt showed him how to stand on the board above	226
226	the axle. Pablo helped him practice pushing off, which is the movement	238
238	needed to get the board rolling. They also explained carving and	249
249	stopping. Zach practiced and also watched the other guys perform some	260
260	advanced moves they had mastered. After thanking his new friends, he	271

A Po	petry Contest		
0	The class listened politely as	s the visiting author read some of her	12
12	poems. After the poet left, their	teacher, Mrs. North, told them to get	25
25	out their writing notebooks. Mrs	s. North wanted each of them to try	37
37	writing a poem. Everyone starte	d scribbling away. Everyone, that is, but	48
48	Brenden. He just stared at the bl	ank page before him, wondering what to	61
61	write. Then, the bell rang. Mrs.]	North told them to finish their poems for	75
75	homework.		76
76	As Brenden walked home fr	rom school, an idea hit him. He would	88
88	write a poem about baseball! He	e loved baseball. At home, he sat down	101
101	at his desk and started writing. E	Brenden's pen could barely keep up with	114
114	the words tumbling out of his he	ead. He was even able to make his words	129
129	rhyme, which the guest poet had	l said could be difficult. The next day,	142
142	Brenden turned in his poem. He	hoped his teacher would like it.	154
154	A few weeks later, Mrs. Nor	th called Brenden to her desk. She told	167
167	him that a local bookstore had a	sked teachers to enter poems, written	179
179	by their students, in the store's y	early poetry contest. Brenden's poem	190
190	had been selected. Mrs. North to	old him what a great honor this was.	203
203	His poem would be published in	a book along with the other selected	216
216	entries. Also, each poet was to re	ead his or her poem that Saturday at the	231
231	bookstore.		232
232	When Saturday came, Brend	den went with his family to the	242
242	bookstore. Finally, it was his tur	n to read. Everyone clapped after he	254

	Words correct: =	
Glas	smaking	
0	The morning sun came in the window, sending a rainbow of color	12
12	dancing around the room. Jayden sat in Gran's kitchen gazing at the glass	25
25	vases that sat on shelves in front of the window. Her grandmother had	38
38	collected them from all over the world. Jayden loved that each piece was	51
51	different. Each time she visited, she saw some new detail that she had	64
64	missed before.	66
66	Jayden asked her grandmother how the glass was made. Gran started	77
77	explaining, but then she stopped. "I know," she said. "Let's visit my	89
89	friend Mary's studio and you can see for yourself."	98
98	At the glass studio, Mary showed them how glass was blown. She	110
110	explained that sand and other ingredients are mixed together and put into	122
122	a very hot furnace to form molten glass. They watched as Mary dipped	135
135	the tip of her blowpipe into the furnace and scooped some glass onto the	149
149	end. Carefully, she rolled the hot glass back and forth on a steel table,	163
163	forming a neat ball. Then she blew into the pipe to form an air bubble	178
178	inside the glass. She said that as the glass cooled, it had to be reheated to	194
194	keep it soft enough to work with. Jayden watched closely as Mary placed	207
207	the pipe back into the furnace.	213
213	While the glass heated, Mary sprinkled some blue and green colored	224
224	bits across the table. Then, she rolled the reheated piece across the bits.	237
237	Once again, she returned it to the furnace. This time, when she removed	250
250	it, the melted color swirled inside. Jayden thought it was very beautiful.	262

Total words:

Errors (include skipped words): -_

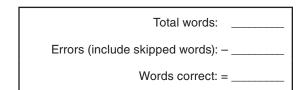

Glassmaking (continued)

262	Finally, Mary shaped the form with wooden blocks and other tools before	274
274	placing it in a cooling oven.	280
280	Jayden had learned so much. She thought about Gran's collection. It	291
291	was now more special than ever.	297

Strawberry Festival Day

0	At the strawberry festival, Tessa stood between her stepmom and	10
10	her dad. The parade was starting. Looking down the street, Tessa was	22
22	startled by one of the floats. "That's the biggest cake I've ever seen!" she	36
36	exclaimed.	37
37	"I know," her stepmom answered. "I've been coming to this	47
47	strawberry festival since I was your age. Every year, people use the	59
59	berries they grow here. They work together to make a huge strawberry	71
71	shortcake. It's always the first thing in the parade. The best part comes	84
84	after the parade. That's when everyone at the festival gets to eat it!"	97
97	When the parade was over, Tessa and her parents made their way	109
109	to the line for a piece of the giant strawberry shortcake. Tessa's mouth	122
122	watered as she wondered what the cake would taste like. Tessa's	133
133	stepmom stood in line and got them each a helping of the cake. "This is	148
148	delicious," Tessa said as she ate it.	155
155	After they finished the cake, they walked around for a long time.	167
167	They stopped and listened to a band in the park, and then rode a few	182
182	rides. As the sun began to set, Tessa got her face painted. She smiled as	197
197	she looked in the mirror at the bright red strawberry on her cheek.	210
210	Tessa took her dad's hand, and with her other hand, she reached for	223
223	her stepmom. They both held Tessa's hands tightly and smiled at her.	235
235	They looked up at the fireworks that lit the dark sky. It was a beautiful	250
250	ending to a great day.	255

Space Camp

0	It was the summer after third grade, and Kelsey was excited. Ever	12
12	since she was little, Kelsey wanted to be an astronaut. This summer,	24
24	she was old enough to go to space camp. For six days she would get to	40
40	experience the life of an astronaut.	46
46	Kelsey would be staying at the space center with the other campers,	58
58	so her father dropped her off the evening before camp began. She was	71
71	so excited for the next day that she had a hard time sleeping. The next	86
86	morning would begin her space adventure.	92
92	The first thing the campers did that morning was put on spacesuits.	104
104	Then they went into a machine that was like a pretend rocket launch.	117
117	The machine was called a simulator. The campers spent the morning	128
128	practicing rocket launches and landings in the simulator. It felt like they	140
140	were on a real rocket.	145
145	After lunch, it was time to divide into groups. Kelsey chose the space	158
158	and aviation group because she wanted to be a pilot. She joined other	171
171	campers who were interested in learning how to fly. The campers learned	183
183	about the principles of flight, and they even spent time in a jet simulator.	197
197	Kelsey spent the rest of the days at camp visiting the space museum	210
210	and climbing the rock wall that resembled Mars' surface. All of the	222
222	campers had a chance to build their own rockets. At the end of the six	237
237	days, the campers launched their model rockets outdoors. Kelsey felt	247
247	proud as her rocket soared high in the sky. As she watched her rocket,	261

		Words correct: =	
Ama	zing Dolphins		
0	Can you jump as high as a l	nouse? Could you win a race with a	15
15	shark? Could you find a quarter	on the playground with your eyes	27
27	closed? You could do all these t	hings if you were a dolphin!	39
39	A dolphin has a very strong	tail that helps it jump high in the air.	54
54	A dolphin's tail muscles are mu	ch stronger than the muscles of other	66
66	mammals. A dolphin pumps its	tail up and down to propel itself through	79
79	the water. A dolphin can swim s	o fast that one flick of its tail sends the	95
95	dolphin sailing into the air. Jum	ping out of the water is one way the	109
109	dolphin gets air while swimmin	g.	114
114	Dolphins do not always swi	m at top speed, but they are always ready	127
127	to go fast if an enemy comes ne	ar. Dolphins often swim together in a	141
141	group. They warn each other if	they see a shark. When escaping a shark,	155
155	dolphins can swim as fast as sor	me speedboats!	163
163	One of the most interesting	things about a dolphin's body is the way	176
176	it finds things. A dolphin makes	clicking sounds that bounce off objects	188
188	in the sea. When the clicking so	unds bounce, they make echoes that the	201
201	dolphin can hear. The sound of	the echoes tells the dolphin where things	214
214	are. Using clicks and echoes, a	dolphin could find a quarter that was a	228
228	half a block away! The clicks an	nd echoes are important because they	240
240	help the dolphin find food. The	sounds also help dolphins stay away from	253
253	enemies.		254
254	When you see a dolphin jur	nping, swimming, and making noises	264

14	was ready for the day's hike. She and her family had recently moved	27
27	to a small ranch. Their land was right next to a nature preserve. Every	41
41	day, Carrie and her teenage brother Jackson explored a new part of the	54
54	preserve.	55
55	During the summer, Carrie and Jackson had the whole day to	66
66	explore. Mom made them a lunch. Then they headed out with their cell	79
79	phones, which they used to keep in touch with their parents. They carried	92
92	backpacks that held their lunches and notebooks. Carrie and Jackson	102
102	liked to make drawings and write about things they saw.	112
112	Carrie and her brother had already hiked many of the trails in the	125
125	preserve and were hoping to find a new, special place. After walking a	138
138	little way up the main path, they stopped to discuss which way to go. It	153
153	was then that Carrie saw a small, overgrown path leading off to the right.	167
167	She wondered how they had missed it on their earlier hikes. They were	180
180	both excited at the chance to find a new part of the preserve. The path	195
195	was very narrow and bushy, but they were determined to follow it to its	209
209	end. Finally, after hiking for over an hour, they came upon a clearing. In	223
223	the clearing was the most beautiful waterfall they had ever seen. Carrie	235
235	and Jackson knew that they had found a special place.	245
245	Carrie and her brother sat down by the edge of the water and took	259
259	off their shoes. As they ate their lunch, they dangled their feet in the	273

Kayla's Special Owl

0	The wildlife center was only a few blocks away. Kayla and her	12
12	family walked there almost every day. She had been visiting the center	24
24	since she was two years old. Kayla loved looking at the animals and	37
37	hiking the surrounding trails. What Kayla liked the very best of all,	49
49	though, were the birds. This summer, she was finally old enough to	61
61	volunteer in the center's bird rescue area. She couldn't wait to start.	73
73	Every week people brought wounded or abandoned birds to the	83
83	center. They were cared for and then released back into the wild. After	96
96	training, Kayla was ready for work. She helped clean cages and mixed	108
108	up special food. Soon, she was able to work with the "babies." She fed	122
122	these tiny birds by hand using a small paintbrush. She would dip the	135
135	brush into water or the food mix and then gently put her hand over the	150
150	bird and drop a small amount into its gaping mouth. Baby birds need to	164
164	be fed every twenty minutes, so this was something the volunteers took	176
176	turns doing all day long.	181
181	Of all the birds Kayla helped, her favorite was a small screech owl.	194
194	She had been the first one to feed the tiny creature, and the two had	209
209	formed a special bond. It needed constant attention. Kayla watched the	220
220	owl get stronger every day as she cared for it. Soon, it could eat on its	236
236	own and was moved from the inside care room to an outside cage for	250
250	birds that would soon be released. The time came to let the little owl go.	265
265	Kayla wasn't sad, though, because she somehow knew she would see her	277

8 Acadience Oral Reading Fluency Level 3/Progress Monitoring 8 Total words: Errors (include skipped words): -Words correct: = How Ryan Made a Difference One day a boy named Ryan asked his parents for seventy dollars. 0 12 His teacher had explained that seventy dollars was sufficient to build a 12 24 well in a poor African country. Many children in Africa were getting sick 24 37 because they lacked clean water to drink. Although Ryan was only in first 50 37 grade, he was determined to help them. 50 57 Ryan's parents agreed to let him do extra chores to earn the money. 57 70 They would pay him one dollar per hour. He washed windows, picked up 70 83 yard debris, and did other chores. In three months, Ryan had earned the 96 83 seventy dollars. 96 98 When Ryan gave the money to the people who build the wells, they 98 111 were grateful. They explained that the money would buy a pump to pull 124 111 water from under the ground. However, it would take a lot more money 124 137 to drill the well before the pump could be used. Drilling the well would 137 151 cost two thousand dollars! Ryan decided to do chores until he could pay 164 151 for drilling the well, too. 164 169 When the people in Ryan's town heard what he was doing, they 169 181 helped him raise more money. In a few months, Ryan had enough money 194 181 to pay for the well. 194 199 The well was built near a village school in Uganda. After the well 212 199 was built, the villagers sent Ryan letters and a picture of the well. They 226 212 had erected a sign that said "Ryan's Well." They would always remember 238 226

the young person who had helped them. Ryan corresponded with the

Total words: Errors (include skipped words): -Words correct: = Lan's First Day It was Lan's first day in her new school in the United States. She 14 had left China just one week earlier, so the English words her classmates 27 spoke sounded strange to her. 32 The teacher explained something and then passed out papers. Lan 42 didn't understand what was on the papers and felt confused. She could 54 tell that her classmates were excited about what they were reading. From 66 their expressions, she guessed it was a story. 74 Some of Lan's classmates gathered at the front of the room. They 86 talked in funny voices and made interesting expressions with their 96 faces. Slowly, Lan realized that the students were acting out a play. Lan 109 watched closely as a girl in a red cape skipped along and then stopped to 124 have a conversation with a tall boy. The boy smiled in a sneaky way and 139 growled like a wolf. "That villain is up to no good," thought Lan. 152 In the end, the tall boy pretended to be an old woman in bed. When 167 the girl in the cape approached him, the boy sprang out of bed and 181 chased her. The girl outsmarted the wolf and escaped. Right then, Lan 193 recognized the story. It was similar to a tale her mother told her about a 208 wolf who tricked children by pretending to be a grandmother. Lan raised 220 her hand. "Lon Po Po!" she said excitedly. 228 Everyone looked at Lan in surprise. "That's right, Lan," said the 239 teacher. "This tale is similar to the Chinese story of Lon Po Po. It's called 254 Little Red Riding Hood." 258

Planting a Butterfly Garden

0	One of the most beautiful insects on earth is the butterfly. There are	13
13	thousands of different kinds of butterflies and they live in all parts of the	27
27	world. In some places, though, butterflies have trouble finding the plants	38
38	they need to survive. Planting a butterfly garden is a great way to help.	52
52	You can both protect and enjoy the butterflies in your area.	63
63	Many parks and public gardens have whole fields planted to attract	74
74	butterflies, but a butterfly garden does not have to be large. It can be	88
88	a small bed in your yard or even a window box. To plan this type of	104
104	garden, first find out what type of butterflies are native to where you live.	118
118	Then, find out what type of plants they like. Try looking at the library or	133
133	at your local garden center.	138
138	After researching local butterflies, pick a spot for your garden. Next,	149
149	decide how large it will be. It can also be helpful to map out a plan for	166
166	the garden. Butterflies like sunshine, so pick a sunny spot. The garden	178
178	should also have some protection from the wind.	186
186	If you are planting your garden in the ground or in a raised bed, you	201
201	will need to prepare the soil before putting in plants. Turn the soil to	215
215	loosen it up, making sure to break up any large clumps. You can add in	230
230	some gardening dirt while you do this. Now it is time to plant. Butterfly	244
244	gardens need host plants for butterflies to lay eggs on and for caterpillars	257
257	to eat. They also need plants that provide nectar to feed the butterflies.	270

Save	e the Turtles!	
0	For millions of years, sea turtles have lived in our oceans. It is	13
13	amazing, when you think about it. They were here when the dinosaurs	25
25	walked the Earth! Now, their future is at risk. The good news is that	39
39	efforts are being made to keep all sea turtles safe.	49
49	Of the seven species of sea turtles, the largest is the leatherback.	61
61	This turtle can grow to over six feet long. They are called leatherbacks	74
74	because they have a softer, more flexible shell than other turtles. They	86
86	live mainly in the open ocean, where they feed on jellyfish. Because they	99
99	can keep their body temperature warmer than that of the water, they are	112
112	able to swim in colder parts of the ocean. Other types of sea turtles are	127
127	not able to do this. Leatherbacks swim thousands of miles a year looking	140
140	for food. Every two or three years, the females walk onto the beach to	154
154	make a nest and lay their eggs.	161
161	Each year, there are fewer nesting leatherbacks to be seen. This is	173
173	because of the growing dangers they face. At sea, this giant turtle often	186
186	gets caught in fishing nets. On land, animals and people disturb their	198
198	nests. The turtles also mistake plastic bags and other kinds of trash for	211
211	jellyfish. These bags can be very harmful to the turtles if they try to eat	226
226	them.	227
227	Laws are being passed to protect the turtles, and people are	238
238	becoming better aware of the risks. Many countries now have beach	249
249	patrols to guard the nests, and there are new ways to track where the	263
