

We are excited to announce that all Acadience® assessments will be available in Acadience® Learning Online (ALO) for the 2023-2024 school year!

With the upcoming availability of all assessments in ALO, we will be moving forward with the retirement of the Acadience® Data Management (ADM) system. Users of Acadience (along with their historical data) will be supported in transitioning to ALO and will gain access to data management with the newest technology and data views designed by authors Dr. Ruth Kaminski, Dr. Roland Good III, and the team at Acadience®. Data for measures in research will continue to be stored in ADM.

ALO provides flexible options for data collection. Schools can utilize paper and pencil administration with manual score entry in ALO. Digital scoring (e.g., assessors testing on touchscreen devices) is also available for Acadience® Reading K–6 and Acadience® Math K–6, providing a more efficient process and additional item level detail captured within the platform.

Assessments available in ALO	Manual Entry	Digital Administration
Acadience Reading K–6	X	X
Acadience Math K–6	X	X
Acadience® Reading 7–8	X	
Acadience® Pre-K: PELI	X	

ALO includes the same data reporting options schools are familiar with in new, interactive data views that allow for greater flexibility and customization. Below you will find resources that provide additional information about ALO reporting features.

Additional support will be provided through the transition to ensure a smooth experience. Over the next few months, we will hold webinars and office hours, provide FAQs and additional support documents, and have Customer Support agents available to answer any questions that you may have. We recognize that many of you are responsible for rostering and setting up your district for benchmark

assessments. Additional communication specific to these tasks will be provided in a later communication and posted to our webpage.

Acadience and Voyager Sopris Learning will be hosting a webinar on February 16th, 2023 at 1:00 CT specifically for sites that are new to the ALO system. This webinar will provide an overview of digital scoring, manual entry, and reporting options available in ALO. Details can be found at the registration link below.
