## Concepts and Applications / Progress Monitoring 1

Notes:

Problems	Skills Assessed
1, 6	<b>Understand the place value system:</b> 1. Compare decimals to the thousandths place. 6. Round decimals to the nearest tenth, hundredth, and thousandth.
2, 7	<b>Graph points on the coordinate plane to solve real-world and mathematical problems:</b> 2. Plot and label ordered pairs. 7. Determine an ordered pair by graphing points on a coordinate plane to solve real-world and mathematical problems.
3, 12, 15	<b>Write and interpret numerical expressions:</b> 3. Interpret and solve numerical expressions. 12. Determine the order of operations of a given numerical expression. 15. Write numerical expressions when given written directions.
4	<b>Convert like measurement units within a given measurement system:</b> Using a provided conversion rate, convert measurement units and solve a multi-step addition problem.
5	<b>Use equivalent fractions as a strategy to add and subtract fractions:</b> Solve problems involving the addition of fractions with unlike denominators.
8A, 8B	<b>Analyze patterns and relationships:</b> 8A. Complete a ratio table. 8B. Plot the points on a coordinate plane and make a line graph that represents the data.
9, 13	<b>Understand concepts of volume and relate volume to multiplication:</b> Determine the volume of an object.
10, 16	<b>Apply and extend previous understandings of multiplication and division to multiply and divide fractions:</b> 10. Multiply two fractions with unlike denominators. 16. Divide a fraction by a whole number.
11, 14	<b>Perform operations with multi-digit whole numbers and with decimals to hundredths:</b> 11. Solve a two-step problem that deals with addition and subtraction of money. 14. Solve a one-step problem that results in a decimal.

8A, 8B	<b>Analyze patterns and relationships:</b> 8A. Complete a ratio table. 8B. Plot the points on a coordinate plane and make a line graph that represents the data.
9, 13	<b>Understand concepts of volume and relate volume to multiplication:</b> Determine the volume of an object.
10, 16	<b>Apply and extend previous understandings of multiplication and division to multiply and divide fractions:</b> 10. Multiply two fractions with unlike denominators. 16. Divide a fraction by a whole number.
11, 14	<b>Perform operations with multi-digit whole numbers and with decimals to hundredths:</b> 11. Solve a two-step problem that deals with addition and subtraction of money. 14. Solve a one-step problem that results in a decimal.

## Concepts and Applications / Progress Monitoring 12

Problems	Skills Assessed
1, 6	<b>Understand the place value system:</b> 1. Compare decimals to the thousandths place. 6. Round decimals to the nearest tenth, hundredth, and thousandth.
2, 7	<b>Graph points on the coordinate plane to solve real-world and mathematical problems:</b> 2. Plot and label ordered pairs. 7. Determine an ordered pair by graphing points on a coordinate plane to solve real-world and mathematical problems.
3, 12, 15	<b>Write and interpret numerical expressions:</b> 3. Interpret and solve numerical expressions. 12. Determine the order of operations of a given numerical expression. 15. Write numerical expressions when given written directions.
4	<b>Convert like measurement units within a given measurement system:</b> Using a provided conversion rate, convert measurement units and solve a multi-step addition problem.
5	<b>Use equivalent fractions as a strategy to add and subtract fractions:</b> Solve problems involving the addition of fractions with unlike denominators.
8A, 8B	<b>Analyze patterns and relationships:</b> 8A. Complete a ratio table. 8B. Plot the points on a coordinate plane and make a line graph that represents the data.
9, 13	<b>Understand concepts of volume and relate volume to multiplication:</b> Determine the volume of an object.
10, 16	<b>Apply and extend previous understandings of multiplication and division to multiply and divide fractions:</b> 10. Multiply two fractions with unlike denominators. 16. Divide a fraction by a whole number.
11, 14	<b>Perform operations with multi-digit whole numbers and with decimals to hundredths:</b> 11. Solve a two-step problem that deals with addition and subtraction of money. 14. Solve a one-step problem that results in a decimal.
