Device and System Recommendations

About Acadience Learning Online (ALO)
ALO is an online, digital assessment and data management platform developed by Acadience Learning LLC. for Acadience assessments. It is the only platform designed by the authors of Acadience assessments.

Administration and Scoring
The online assessment experience was designed for an assessor to use larger touchscreen platforms for measure administration. ALO measure administration is not available for use on mobile devices or standard desktops/laptops.

Bandwidth
ALO is a progressive web application so the bandwidth needed is simply what it takes to access the web.

Data Dashboard and Reports
ALO's data management system including the data dashboard and data views (reporting) can be accessed whenever the user is connected to the web. The data system was designed to be accessed via tablets and standard desktops/laptops.

Recommended Devices and Operating Systems
On the following pages are a list of recommended platforms which may be used for online administration and/or to access the data management system via the web. This list is not the same as minimum requirements.

The measure experience was developed for larger touchscreen platforms and is not available for use on mobile devices or standard desktops/laptops without touchscreens.

Device recommendations for website and measure administration (a touchscreen is required for digital assessments/ measures):

Apple iPad
iPad OS 17+/ Safari 17+

Android tablet
Android 14+/ Chrome latest 2 versions
Due to the variety of Android devices available, we can't list all supported devices. In most cases, devices with the following minimum specifications will be supported:

Display: 9.7" or larger screen with 1024 x 768 or larger viewport size*,
Operating system: Android 14+
Browser: Chrome (latest 2 versions)

Chromebook (touchscreen required for digital assessments)
Due to the variety of Chromebook devices available, we can't list all supported devices. In most cases, devices with the following minimum specifications will be supported:

Display: 11" 1366x768 or larger viewport size*
Operating system: Chrome OS
Browser: Chrome (latest 2 versions)

The native resolution of a tablet is not always the same as the viewport size. A tool such as https://viewportsizer.com/ can help you determine the actual viewport size of your device.

Note: A Progressive Web Application (PWA) is required to administer assessments with the exception of Maze and Silent Reading.

Device recommendations for website usage including rostering, assessment details, manual scoring, reports, etc:

PC/ Windows
Operating system: Windows: 10+
Browser: Chrome (latest 2 versions)

Chromebook
Operating system: Chrome OS
Browser: Chrome (latest 2 versions)

Apple/ Mac
Operating system: iOS 17+
Browser: Safari 17+ or Chrome (latest 2 versions)
