Directions: Make sure you have reviewed the scoring rules in the Acadience Reading 7–8 Assessment Manual and have them available. Say these specific directions to the student:

- I would like you to read a passage to me. Please do your best reading and read for meaning. If you do not know a word, I will read the word for you. Keep reading until I say “Stop.” Be ready to tell me all about the passage when you finish. (Set the timer for 90 seconds and place the passage in front of the student.)
- Begin testing. Put your finger under the first word (point to the first word of the passage). Ready, begin.

Help from Nana

0 Last Wednesday, with uncharacteristic confidence, I registered to 8
8 sing in my school’s annual talent competition. While I am passionate 19
19 about singing and consider myself above average in terms of talent, 30
30 I am typically too shy to compete against others. Reflecting on my 42
42 determination, despite my jitters, I decided that my newfound confidence 52
52 must have come from the recent encouragement I received from my 63
63 grandmother. 64
64 For 13 years, my family resided near my paternal grandmother, 74
74 Nana, and we were extremely close. This past spring, my father’s 85
85 employer transferred him across the country, but Nana remained in her 96
96 home of 60 years. Nana had instilled in me an affinity for music by 110
110 singing with me as we completed various chores. When Nana assured me 122
122 that I had an angel’s voice, I sang louder and more confidently. Sometimes 135
135 I glimpsed at Nana, her eyes closed, swaying gently back and forth as if 149
149 my song was a rocking chair, lulling her to sleep. 159

298 What most Europeans ignored was that other people already called 308

346 History shows us that times of great change bring results both good 358

Age of Discovery

0 The 1400s were times of great change and discovery in Europe. 11
11 Nations such as France, England, and Spain had formed strong 21
21 governments, and as these governments collected taxes, their wealth grew. 31
31 Citizens became richer, and more people owned land and bought goods 42
42 and services. Governments and individuals had money to spend and they 53
53 began looking for new places to spend it. 61
61 Traders first looked to the Far East. Europeans were eager to buy the 74
74 spices, silks, and jewels that came from Asia, but land routes were difficult 87
87 and costly to navigate, or get across. Problems grew when these routes 99
99 came under the control of groups hostile to Christianity, the primary 110
110 religion in Europe. 113
113 Europeans needed new ways to get to Asian markets so they looked 125
125 west, across the Atlantic Ocean. If the world was round, as many people 138
138 believed, there must be a water route to Asia. This was the idea that sent 153
153 Christopher Columbus on his voyage in 1492. However, he landed not in 165
165 Asia, but on islands south of what is now Florida. He happened upon a 179
179 “new” world by accident and that world was filled with gold and silver, 192
192 plants and animals, and other natural resources. 199
199 More than 300 years of exploration and colonization, or establishing 209

221 Driven by a hunger for gold, Spanish soldiers conquered the civilizations 232

Elephant Seals

0 Elephant seals are remarkable marine mammals that migrate farther 9

9 than any other mammal in the world, traveling up to 13,000 miles in one 23

23 year. They are also the only mammal that migrates twice annually. Adult 35

35 males can grow to over 14 feet long and weigh up to 4,500 pounds. They 50

50 are not called elephant seals because of their massive bodies. Instead, they 62

62 are so named because adult males have large noses that are pendulous, or 75

75 droop and hang like an elephant's trunk. 82

82 Each December, northern elephant seals migrate from their offshore 91

91 feeding grounds to their breeding beaches, or rookeries, along the coasts 102

102 of California and Mexico. Soon after their arrival, female elephant seals 113

113 give birth to pups that were conceived 11 months before. The pups nurse 126

126 for 28 days and then the females mate with one or more of the dominant 141

141 males. The adult seals leave the pups on the breeding beaches in March 154

154 and head to the open ocean to forage for food. 164

164 The male elephant seals swim thousands of miles along the continental 175

175 shelf, some as far as the Aleutian Islands in Alaska. They feed on fish, small 190

190 sharks, and rays. The females generally swim into deeper waters where 201

201 they feed primarily on squid. Extraordinary divers, elephant seals spend 90 212

212 percent of their lives under water. They plunge to depths of 1,000 to 5,000 226

226 feet and remain submerged for 15 minutes to 2 hours. When they emerge 239

239 to breathe, they stay at the surface for only 4 or 5 minutes before 253

Circle a 2 if the student mentions *both*.

After the student completes the Recall, look to see if *both* the concept *and* detail are missing for an item.

- If the student missed any items say **Now, I am going to ask you some questions**. Ask the corresponding follow-up question(s) and then proceed to the vocabulary questions.
 - The correct response to the follow-up question is the detail (after the +) in the key concept box. Circle the 1 for a correct response to the question. Circle the 0 for an incorrect response or no response.
- If the student did not miss any items say **Now, I am going to ask you some questions**. Proceed to the vocabulary questions.
