## Four Levels of Performance Compared to Benchmarks

If a student achieves an At or Above Benchmark, the odds are in favor of that student achieving later reading or math outcomes.

### Above Benchmark:

Odds are generally 90% to 99% of achieving subsequent benchmarks and important reading or math outcomes. **Student is not likely to need support to make adequate progress.**

### At or Above Benchmark:

Odds are generally 80% to 90% of achieving subsequent benchmarks and important reading or math outcomes. **Student is likely to make adequate progress with effective core instruction.**

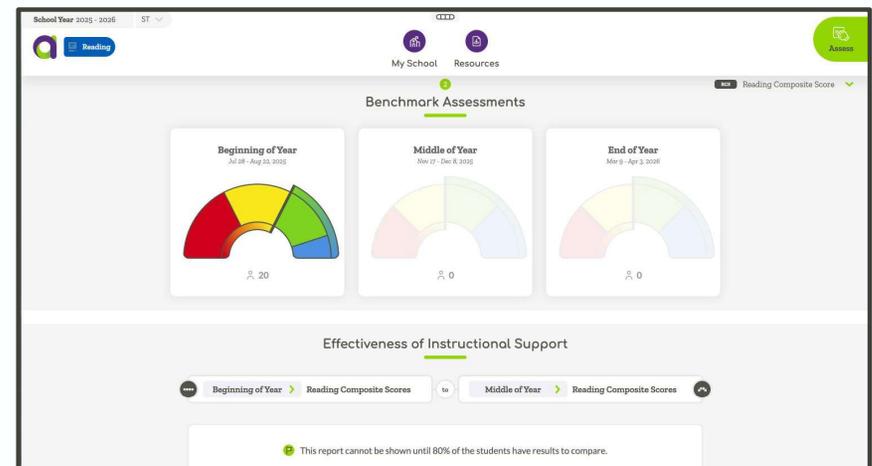

### Below Benchmark:

Odds are generally 40% to 60% of achieving subsequent benchmarks and important reading or math outcomes. **Student is likely to need strategic support to make adequate progress.**

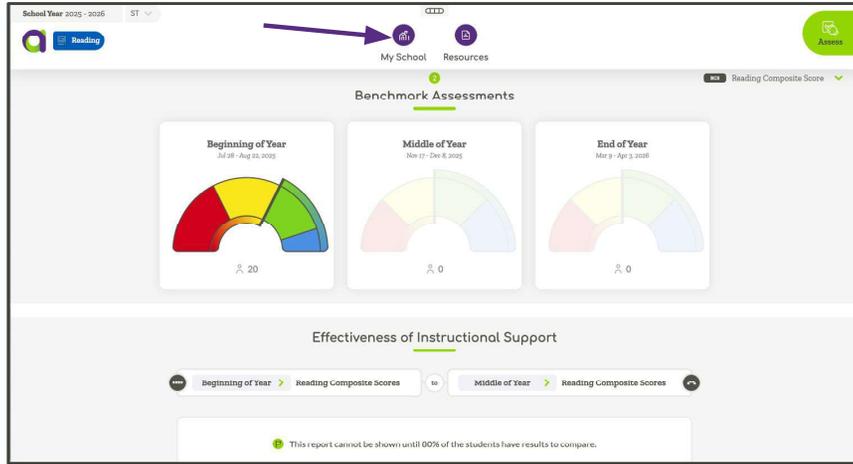

### Well Below Benchmark:

Odds are generally 10% to 20% of achieving subsequent benchmarks and important reading or math outcomes. **Student is likely to need intensive support to make adequate progress.**
